TRENDS IN CANADA COUNCIL SUPPORT TO THE ARTS

Introduction

These Technical Tables have been prepared by Research & Evaluation in order to provide an overview of long-term trends in Canada Council support to the arts. The tables are subject to clear and compelling limitations. Over the last decade numerous policy and program changes have altered the nature and pattern of Canada Council support to the arts. Knowledge of such change is essential to verify any inferences or conclusions which may be drawn from the tables.

The tables are divided into five sections. Each, with the exception of Section V, provides progressively more detailed information concerning Canada Council support to the arts. The sections are

I Political Economic Setting,

II Support to the Disciplines,

III Support by Program,

IV Support to the Disciplines by Program,

V Supplementary Tables.

Before reviewing the nature and sources of data displayed in each section, it is appropriate to consider certain general characteristics of the Technical Tables. **First,** data are displayed in a form amenable to trend analysis, i.e., data in any given table have been transformed from a complexity of program data into consistent and comparable categories displayed as time series. Thus the tables are intended to tell their tale through time. However, meaningful detail available in source documents may have been lost. For this reason readers are advised to consult the footnotes at the bottom of each table.

Second, source documents, particularly for Section I, are based on different and distinct accounting systems and principles. As a result, comparisons between tables are not necessarily valid.

Third, data are generally displayed for Fiscal Year 1971-72 to Fiscal Year 1980-81, or calendar equivalents. Data in Section I, however, are reported for varying time periods. Further, data collection was completed in March 1982. Certain data series, therefore, are subject to update in the light of subsequent change or revision in source documents.

Fourth, Canada Council uses an **accrual system of accounting.** This means that tables reflect grants to which Council **committed** itself in any given year. Accrual accounting produces certain anomalies in both Aid to Individuals and Aid to Organizations. In Aid to Individuals, particularly in music, program competitions may overlap two years. This may result in grants awarded in a given year being charged against a previous or subsequent fiscal year. Similarly, in Aid to Organizations, a reporting anomaly may result when grants are made to an organization with a fiscal year that overlaps Council's fiscal year. This situation can result in two grants for different fiscal years being reported in one year.

Introduction
(cont'd)

In spite of these limitations, it is hoped that the Technical Tables will assist the Board, officers and other interested parties in appreciating trends in Canada Council support to the arts. The Technical Tables will be updated annually so as to provide an effective ongoing instrument of the Council's accountability, budgeting, evaluation and planning. Suggestions and comments concerning improvements in reporting are invited at any time.

DATA DISPLAYS

In addition to the number and current dollar value of grants, each table displays a set of trend indicators of Canada Council support to the arts during the last decade. These indicators are necessary but imperfect measures of more general matters of concern. It is hoped that the indicators will stimulate discussion and clarification of these larger questions. In addition to number and value of grants expressed in current dollars, four trend indicators are provided:

1. Effective Support,
2. Relative Support,
3. Stability of Support,
4. Adequacy of Support.

1. Effective Support

Support to the arts, usually expressed in current dollars, may appear to be rising when, in fact, its impact actually has declined as a result of the ravages of inflation. Review of alternative price indices suggests that the best available measure of inflation in support to the arts is the Implicit Price Index of Government Current Expenditure on Goods and Services (IPI/GCE). The IPI/GCE (see Table 27) accounts for costs generally associated with operations of service sector organizations, e.g., wages, salaries, office supplies and current expenditure on plant and equipment. As measured by the IPI/GCE, prices have risen more than two-and-a-half times from 1971 to 1980. The IPI/GCE has been used to **deflate** current dollar figures displayed in the Technical Tables in order to provide some measure of Effective Support (ES) to the arts.

2. Relative Support

Relative Support (RS) refers to the **percentage distribution of support** in a given year. In the Technical Tables the number and value of grants are displayed as percentages of relevant table totals. Changes in percentage share generally reflect changing resource priorities from year to year. A number of factors, however, affect interpretation of changing priorities. For example, new programs may follow a maturation cycle of rapid early growth leading to stable relative support within Council's priorities. Declining RS for established programs, therefore, could indicate the introduction of new programs rather than a policy decision to reduce the resource priority of established programs.

3. Stability of Support

Stability of Support (SS) refers to the **annual rate of change** (ARC) in Effective Support. SS measures the ability to administer an effective and ongoing program. If, for example, a given program displays numerous ups and downs in Effective Support, it is probable that administration of the program was significantly more difficult than for a program with a more stable growth path.

DATA DISPLAYS
(cont'd)

4. Adequacy of Support

Adequacy of Support refers to the **average value of grant** (AVG) in constant 1971 dollars. AVG measures the changing impact of support on individual artists and arts organizations. It is the most imperfect trend indicator presented. First, AVG is affected by the number of grants given relative to available resources. Declining AVG, therefore, could indicate a "spreading thin" of support. Second, AVG, specifically for organizations, is affected by the size of companies requesting Council support. Declining AVG, therefore, could indicate grants to more but smaller arts companies. Third, AVG does not provide a measure of the **real need** of artists or arts organizations. Instead, AVG measures the pattern of average Council support to individual artists and arts organizations through time.

SECTION I

POLITICAL ECONOMIC SETTING

In Section 1 Canada Council Expenditure is displayed in comparison with selected data series in order to define the political economic setting in which Council operates and from which it draws its resources. Data are provided for other public agencies involved in the field of culture, as well as the National Accounts which place cultural activity in context.

Table 1 National Expenditure

The System of National Accounts is an internationally recognized economic model for reporting the value of a nation's production and consumption of goods and services. Data displayed in Table 1 have been derived from The System of National Accounts, Statistics Canada, Catalogue 13-201. Council Expenditure is displayed relative to three relevant National Account items:

(a) Gross National Expenditure (GNE), which is the sum of final sales of all goods and services to Canadians;

(b) Government Current Expenditure on Goods, Services and Gross Capital Formation (GCE) which is displayed for federal, provincial and local governments as well as hospitals;

(c) Personal Expenditure on Education and Culture (PEEC), which is the sum of final sales of cultural and related goods and services to individual Canadians. It should be noted that part of the decrease in PEEC can be explained by the reclassification of denominational school spending as public, not private, expenditure.

SECTION I

POLITICAL ECONOMIC SETTING
(cont"d)

Table 2 **Tri-Level Cultural Expenditure**

The Canadian System of Government Financial Management Statistics (CSGFMS) is a system of inter-governmental accounts which reports federal, provincial and local government finances according to a common accounting system. The CSGFMS is used for purposes of the Fiscal Arrangements Act in order to determine equalization payments to the provinces. Data are presented for only the General Government Universe, i.e., Crown Corporations, and most other "arms-length" agencies are excluded. However, data include governmental grants and contributions to agencies such as the Canada Council.

Data displayed in Table 2 include Tri-Level, Federal, Provincial and Local Cultural Expenditure (CE). CE includes grants and contributions, facilities and operating expenses. CE does not include the Canadian Broadcasting Corporation, the Ontario Education Communications Authority, and the Quebec Broadcasting Bureau, and other provincial broadcasting authorities, which for purposes of the CSGFMS are classified as communications. In addition, lottery expenditure is generally excluded. As a result, reported provincial cultural expenditure is understated in that provincial support increasingly comes from lottery revenues.

Table 3 **Gross Federal Cultural Expenditure**

Gross Federal Cultural Expenditure (GFCE) includes cultural expenditures of the federal government through twelve major cultural agencies, corporations and departments and, at "arms-length", the Canada Council. A list of agencies forms part of Table 3. GFCE has been derived from the federal "Blue Book" Estimates and represents actual expenditure except for 1981-82 (forecast expenditure) and 1982-83 (estimate). GFCE includes budgetary and non-budgetary expenditure as well as revenue from all sources, allocatable expenses for accommodation provided by Public Works, and services provided by other departments of the federal government.

SECTION II

SUPPORT TO THE DISCIPLINES

For purposes of the Technical Tables, Disciplines include **Dance, Music, Theatre, Visual Arts, Film and Video, Writing, Other Disciplines,** and **Explorations.** The Explorations Program encourages investigation of new forms of cultural expression in order to develop new perspectives of Canada and its heritage. Other Disciplines include emerging and generally controversial art such as Multimedia, Interdisciplinary Art, Arts Administration, Performance Art, and the Visiting Foreign Artists Program.

SECTION II

SUPPORT TO THE DISCIPLINES
(cont'd)

Table 4 **Support to the Disciplines**

Data are displayed for eight disciplines. Aid to Organizations in the performing arts, i.e., dance, music and theatre, includes grants and allocatable services provided by the Touring Office of the Canada Council, but excludes other Touring Office services which could not be allocated to the individual disciplines. Aid to Organizations in the visual arts includes purchases and related services provided by the Canada Council Art Bank, but excludes other Art Bank services.

Table 5 **Support by Responsibility Centres**

Responsibility Centres (RC) are the operational units which administer Council's support. Data are displayed for nine RC's: the Awards Service, the Dance Section, the Music Section, the Theatre Section, the Visual Arts Section, the Writing Section, the Art Bank, the Explorations Program and the Touring Office. Although film and video are part of the Visual Arts Section, data on film and video are shown separately because of the unique nature of these programs and their growing importance.

SECTION III

SUPPORT BY PROGRAM

For purposes of the Technical Tables, Canada Council support to the arts is defined so as to include two general program categories: Aid to Individuals and Aid to Organizations.

Aid to Individuals embraces all programs administered by the Awards Service of the Canada Council. During the 1970's the nature and names of programs in Aid to Individuals have changed a number of times. For purposes of the Technical Tables, Aid to Individuals has been displayed under the six current program categories:

(a) **Arts Grants "A"**--to established artists to provide a year to conduct an approved work program. Arts Grants "A" also include an experimental program of Long-Term Grants in Writing;

(b) **Arts Grants "B"**--to developing artists to provide a year to conduct an approved work program;

(c) **Short-Term Grants**--to provide artists with living expenses for a maximum of three months to conduct an approved project;

(d) **Travel Grants**--to enable artists to attend special artistic events and other occasions important for career development;

(e) **Project Cost Grants**--to help artists pay for arts supplies and services necessary to conduct an approved project; however, the grant can not be used for living expenses;

(f) **Other Grants**--to assist other artistic activity by individuals such as the writing of memoirs and visits by foreign artists.

SECTION III

SUPPORT BY PROGRAM
(cont'd)

Aid to Organizations is defined to include all programs administered by Responsibility Centres other than the Awards Service. For purposes of the Technical Tables six types of programs are identified:

(a) **Operating Grants**—to sustain the ongoing operations of arts organizations;

(b) **Project Grants**—to support specific one-time activities of arts organizations;

(c) **Purchases**—to obtain art work or artistic equipment from, or for, artists and arts organizations. Programs include Art Bank Purchases, Book Purchases, Theatre Equipment Purchases, and Film and Video Equipment Purchases;

(d) **Touring Office Grants**—to support tours by Canadian performing artists and groups outside their region, to develop regional touring circuits and impresarios, and to allow foreign companies to tour Canada as part of cultural exchanges;

(e) **Other Grants**—to support artistic aspects of larger socio-cultural events, e.g. the Olympics, Governor-General's and other literary awards, and programs for which no consistent time series is possible, e.g. Deficit Retirement Grants provided in the early and mid-70's, Artists-in-Residence, and various short-lived programs;

(f) **Explorations**—to allow individuals, groups and associations to investigate new forms of cultural expression in order to develop new perspectives of Canada and its heritage.

Table 6 Aid to Individuals

This table displays the number and percentage distribution of Requests, by program, and the Success Ratio of Requests. Requests include only **eligible requests**, i.e., applications which have been screened by Council officers to determine eligibility. Requests, therefore, **do not fully represent the demand** for support. Eligible Requests are generally submitted to a jury of artists selected from an approved jurors' list. Successful Requests, i.e., Grants, are reported in Table 7, along with Grants in Aid to Organizations. The ratio of Grants to the number of eligible Requests is known as the Success Ratio and is reported only for Aid to Individuals.

Table 7 Aid to Individuals & Organizations

This table displays data concerning grants in Aid to Individuals and Organizations. Data include the number, percentage distribution, and annual rate of change in grants; the current and constant dollar value of grants; and the distribution, annual rate of change, and average value of grants in constant 1971 grant dollars.

SECTION IV

SUPPORT TO THE DISCIPLINES BY PROGRAM

For each of the eight disciplines two tables are displayed. The first table concerns requests for Aid to Individuals, while the second shows grant data for Aid to Individuals and Organizations.

Tables 8 to 13 **Dance, Music, and Theatre—The Performing Arts**

Data on dance, music and theatre—the three disciplines which comprise the performing arts—are displayed in Tables 8 through 13. The introduction of the Touring Office in 1973-74 significantly affected the pattern of support to each of the performing arts.

Tables 14 & 15 **Visual Arts**

Visual Arts data concern support to architecture, painting, sculpture, drawing and photography as well as Art Bank purchases, but exclude film and video which is shown separately in Tables 14 and 15. The introduction of the Art Bank in 1972-73 significantly affected relative Council support to the visual arts.

Tables 16 & 17 **Film & Video**

Although film and video are part of the Visual Arts Section, data on film and video are shown separately because of the unique nature of these programs and their growing importance. The introduction of Equipment Purchase Grants in 1976-77 affected Council's support to film and video.

Tables 18 & 19 **Writing**

With respect to Aid to Individuals, an experimental program—Long-Term Grants—has been included as Arts Grants "A". Aid to Organizations reflect the introduction of a series of new programs during the 1970's. Programs in publication assistance, translation, and book purchases were introduced over two years beginning in 1972-73. In 1975-76 new programs to assist the promotion and distribution of Canadian books and periodicals also were introduced.

Table 20 **Other Disciplines**

Data displayed in Table 20 concern emerging and usually controversial art forms such as Interdisciplinary Art, Multimedia, Performance Art and Arts Administration. As illustrated in the table, Other Disciplines have experienced a discontinuous and erratic pattern of support. This pattern reflects the evolving and controversial nature of these art forms.

Table 21 **Explorations**

The Explorations Program was introduced in 1973-74. Explorations grants are made to individuals, groups, and associations, and are intended to encourage investigation of new forms of cultural expression so as to develop new perspectives of Canada and its heritage.

SECTION V

SUPPLEMENTARY TABLES

Tables 22 to 24 Aid to Individuals—Citizenship, Language, and Sex

For information purposes Tables 22 through 24 provide data on, respectively, citizenship, language and sex of applicants and grantees in Aid to Individuals. Relevant data are shown for the number of requests and number of grants and are displayed by discipline.

Table 25 Accumulated Support to the Disciplines

This table has been derived from Technical Table 4. It shows the accumulated Support to the Disciplines over the period 1971-72 to 1980-81 in constant 1971 dollars. Accumulated support in current dollars is not displayed because the impact of inflation renders aggregation of current dollar support relatively meaningless. By way of example, measured by the Implicit Price Index, one current 1971 dollar is equal to two-and-a-half 1980 dollars.

Table 26 Touring Office Support to the Disciplines

This table has been derived from Technical Tables 9, 11 and 13 concerning Dance, Music and Theatre. The table displays grants and allocatable services provided by the Touring Office to the individual disciplines. The table excludes, therefore, support services which could not be allocated to the individual disciplines.

Table 27 & 28 Implicit Price Index & Population of Canada

Table 27 displays the Implicit Price Index of Government Current Expenditures on Goods and Services (IPI/GCE), and the population of Canada. The IPI/GCE has been used throughout the Technical Tables to deflate current dollars to constant 1971 dollars. Table 28 shows the population figures which have been used to calculate the per capita expenditure displayed in Section I - Political Economic Setting. Both the IPI/GCE and population figures were obtained from The System of National Accounts, Statistics Canada, Catalogue 13-201.

Table 29 Program Definitions for Aid to Visual Arts, Film and Video, and Writing

For purposes of the Technical Tables it has been necessary to develop standard program categories in Aid to Organizations. In the case of the performing arts, grant programs tend to fall into three distinct categories: Operating, Project and Other Grants. In writing, visual arts, and film & video, however, programs do not fall into such standard categories. Accordingly, it has been necessary, in consultation with the relevant Sections, to allocate programs to the standard classifications. Table 29 displays the actual programs in writing, visual arts, and film and video corresponding to the standard categories used in the tables.

Table 30 Statistical Symbols

Table 30 displays the standard statistical symbols which have been used throughout the Technical Tables.

Table 1

NATIONAL EXPENDITURE

NATIONAL ACCOUNTS	1971	1972	1973	1974	1975	1976	1977	1978	1979	1980

Source: "Blue Book" Estimates, Program by Activity.

Notes

GFCE include budgetary and non-budgetary items, and is gross of revenue, allocatable accommodation provided by Public Works and other services provided by other departments.

(a) actual expenditures.

(fe) forecast expenditures.

(e) estimate as at January 1, 1982.

(1) Prior to FY 1980-81 all Agencies and Arts & Culture excluding the C.R.T.C. were under Secretary of State.

(2) FY 1979-80 to FY 1982-83 exclude salaries of the Lieutenant-Governors which remain under Secretary of State, and also exclude program costs associated with publication mailings.

(3) Excludes unallocatable direct and indirect expenditures associated with other federal cultural departments and programs, e.g. External Affairs and Industry, Trade & Commerce.
